

lex::TokenObserver

```
classDiagram
    class lex::TokenObserver
    class lex::TokenLogger
    lex::TokenLogger --|> lex::TokenObserver
```

A UML class diagram illustrating inheritance. The base class, `lex::TokenObserver`, is represented by a gray-shaded rectangular box at the top. The derived class, `lex::TokenLogger`, is represented by a white rectangular box at the bottom. A solid blue arrow points vertically from the top of the `lex::TokenLogger` box to the bottom of the `lex::TokenObserver` box, indicating that `lex::TokenLogger` inherits from `lex::TokenObserver`.

lex::TokenLogger
